New device connection

Hello,
we're together connect now your device to the [starline-online.ru](#) monitoring server.

- The process of the connection and configuring lasts from 7 to 15 minutes, depending on type/model of the device and the quality of cellular communication.
- Be ready to send from your phone a few SMS with the configuration commands on the device number, and receive reply messages.
- Attention! An indispensable condition for monitoring is availability of funds on the device's SIM card account. Before starting the connection process, verify and, if necessary, refill the balance.

Start connecting ➤
